CAREER OBJECTIVE

- I am a person with strong determination, looking to use my solid background in computer science and practical knowledge of data structures and algorithms and web development. I aspire to work as an software developer Engineer, where I can bring fresh ideas to the table and further develop my skills in web development technologies.

EDUCATION

KL University, Guntur

B.Tech - Computer Science and Engineering - CGPA - 9.5

2021 – Till Dates

333Guntur, Andhra Pradesh

COURSEWORK

- | | | | |
|---------------------------------------|-------------------------------------|---------------------|------------------------|
| • Data Structure and Algorithms (DSA) | • Database Management System (DBMS) | • Operating Systems | • Software development |
| | | • OOPs | • Deep Learning |

INTERNSHIP

Full Stack SDE Intern at WebileApps [🔗](#) |

Dec 24 - May 25

Worked on full-stack web development projects using the MERN (MongoDB, Express.js, React.js, Node.js) stack, contributing to scalable and responsive applications.

Developed reusable React components and integrated RESTful APIs to deliver dynamic user experiences.

Improved performance and user engagement by enhancing application responsiveness and implementing best practices in code modularity and testing.

PROJECTS

Image Edit Using OPENCV | [Flask,HTML,Bootstrap](#)

2024

- Image Processing: Converts images to grayscale and changes file formats (e.g., PNG to JPG, WEBP).
- User-Friendly Interface: Web-based application with intuitive navigation and options for various editing operations.
- Technologies Used: Built with Flask for the backend and OpenCV for image manipulation, providing efficient and reliable performance.

Airline Reservation System Micro service | [Micro services with Spring Boot,JSP](#)

2023

- Module consists of 3 different types of users with different functionalities.
- Divided the application into smaller parts that can be deployed independently.
- Ensure fault tolerance by designing the system such that manager and customer functionalities remain operational independently of the admin service..

Glaucoma Detection using Fundus Images of eye | [Deep Learning](#)

March 2022

- I completed a project using deep learning algorithms to detect glaucoma, a serious eye condition, by analyzing detailed images of the eye.
- By training the system with a large dataset and rigorous testing, we achieved high accuracy of 90 percent in identifying potential cases of glaucoma.

TECHNICAL SKILLS

Languages: Java,Python,Java Script, C, HTML, CSS,SQL

Frameworks: Spring Boot,Django,MERN

Database: MySQL, Postgres, MongoDB

Developer Tools: VS Code, PyCharm, IntelliJ, Eclipse, Git, Spring Tool Suite, Postman, Android Studio,Swagger API

GLOBAL CERTIFICATIONS

- Red Hat Certified Enterprise Application Developer - Verify
- AWS Certified Cloud Practitioner - Verify
- HackerRank Software Engineer - Verify
- Microsoft Certified: Azure AI Fundamentals - Verify
